PROFESSIONAL SUMMARY

Data Analyst with an extensive background in business ownership, operations management, and commercial optimization. Expert in converting transactional datasets into data-driven strategies, defining corporate KPIs, and building interactive dashboards that optimize resource allocation and business profitability.

TECHNICAL SKILLS

- Languages & DBs: SQL, Python, PostgreSQL, DuckDB, Pandas, NumPy, Advanced Excel.
- BI & Analytics: Power BI, Tableau, Streamlit, Plotly, KPI Architecture, Executive Reporting.
- Frameworks & Cloud: Git, GitHub, ETL Pipelines, REST APIs, Docker, Data Governance, AWS.

PROFESSIONAL EXPERIENCE

Data Analyst & Analytics Developer (Freelance) | 2024 – Present

- Built automated ETL pipelines (Python, AWS) and containerized data architectures (Docker, FastAPI).
- Automated operational workflows via APIs and GenAI, cutting manual task execution time by 40%.
- Project - NetTension: Streamlit dashboard processing 1.8M+ rows using DuckDB; validated 5/6 market hypotheses.
- Project - DataScope: Multi-source salary pipeline featuring advanced title normalization (1,037 to 15 roles).

Co-Founder & Business Analytics Lead | Soda Madrid | 2017 – 2024

- Co-founded a commercial venture, leveraging daily transactional insights to scale average daily sales metrics 5x.
- Optimized operational schedules by analyzing hourly revenue density, concentrating resources on peak-demand windows.
- Streamlined commercial strategy by rationalizing the product portfolio, reducing inventory redundancy.
- Consolidated corporate procurement by unifying independent vendor networks into a single, optimized supplier pipeline.
- Designed custom analytical models to track sales-mix shifts and monitor real-time conversion rates.

Prior Experience | Operational & Technical History

- Co-founded a family commercial project, directing product development, menu engineering, interior layout design, and brand marketing assets.
- Provided operational support, data tracking, and administrative assistance within an international commodities trading firm in the energy sector.
- Developed long-term expertise in service workflows, combined with technical audio production and equipment configuration as a Sound Engineering Technician.

EDUCATION

- Advanced Specialization in AI & Data Engineering (+1,250h) | Factoría F5 (2026)
- Data Science & Analytics Bootcamp (+500h) | The Bridge (2025)
- Bachelor's Degree in Image and Sound Design | University of Buenos Aires (2009 – 2012)
- Higher Technician Diploma in Sound Engineering | IFP C. M.R. de Valcárcel (2007 – 2009)

LANGUAGES

- Spanish (Native) · English (Professional Proficiency)
