PROFESSIONAL SUMMARY

Data Scientist with a foundation in business ownership, resource optimization, and quantitative operations. Expert in advanced predictive modeling, statistical validation, and hyperparameter tuning, with a history of transforming unstructured workflows into efficient algorithms.

TECHNICAL SKILLS

- Data Science & ML: Scikit-learn, Optuna, Random Forest, Regression, NLP, Transformers, Gemini LLM.
- Core Analytics: Python, SQL, Polars, Pandas, NumPy, EDA, Hypothesis Testing, Statistical Modeling.
- Tools & Certs: Streamlit, FastAPI, Docker, Git, Canvas Credentials (ML & Deep Learning Certified).

PROFESSIONAL EXPERIENCE

Data Analyst & Analytics Developer (Freelance) | 2024 – Present

- Designed robust data pipelines (Python, AWS) to power downstream analytical and machine learning tasks.
- Created automated workflows integrating GenAI APIs, optimizing infrastructure performance by 40%.
- Project - Optimus Price: Hotel pricing model (Random Forest + Optuna) yielding a +30% net revenue lift.
- Project - Attention Observatory: NLP modeling pipeline analyzing 16K+ posts; uncovered a 0.974 Gini index.

Co-Founder & Operations Analytics Lead | Soda Madrid | 2017 – 2024

- Applied descriptive statistics and capacity planning to model and support a 5x statistical growth in daily sales metrics.
- Conducted time-series analysis on transactional timestamps to optimize operating schedules, strategically concentrating activity within high-density demand windows.
- Performed product-mix optimization analysis to rationalize inventory, compressing an unstandardized product portfolio into a high-margin catalog.
- Executed quantitative supply chain modeling to consolidate independent vendors, improving raw materials margin predictability.
- Evaluated shift consumption trends and volume throughput to eliminate stock waste within a high-density facility.

Prior Experience | Operational & Technical History

- Co-founded a family commercial project, directing product development, menu engineering, interior layout design, and brand marketing assets.
- Provided operational support, data tracking, and administrative assistance within an international commodities trading firm in the energy sector.
- Developed long-term expertise in service workflows, combined with technical audio production and equipment configuration as a Sound Engineering Technician.

EDUCATION

- Advanced Specialization in AI & Data Engineering (+1,250h) | Factoría F5 (2026)
- Data Science & Analytics Bootcamp (+500h) | The Bridge (2025)
- Bachelor's Degree in Image and Sound Design | University of Buenos Aires (2009 – 2012)
- Higher Technician Diploma in Sound Engineering | IFP C. M.R. de Valcárcel (2007 – 2009)

LANGUAGES

- Spanish (Native) · English (Professional Proficiency)
